

Companies are increasingly looking for third-party expertise to support their mission-critical Web applications, allowing them to focus their own IT resources on core business activities. Globix has the skills to design, build, and implement infrastructures to support the integration and performance of these applications.

PROFESSIONAL SERVICES

Our consultants work in partnership with you to develop a deep understanding of your business environment. Using our design and planning expertise, we can translate need into requirement and requirement into solution, ensuring that you can fully realize the benefits that today's Internet-based technologies offer.

Service Options

Multi-tiered Infrastructure Design and Build

From the latest load balancing technology to high availability system configurations, we are well versed in designing complex, multi-tiered infrastructures that meet your security, network, and application needs.

Infrastructure Consultancy

Whether your business is outgrowing your infrastructure, or you are looking to refresh technology, or your Web system is not performing efficiently, our

consultants can analyze your existing infrastructure and make recommendations to improve application performance, enhance security, increase scalability, or improve server efficiencies.

Migration Services

Our team of solution architects and project managers ensure that any migration project has a smooth transition from providing support in the initial planning and risk evaluation stages through to the actual build and implementation of the system.

Disaster Recovery and Business Continuity Planning

Globix services enable you to maintain business operations around the clock. Whether you need to perform maintenance, add capacity, run additional live services during peak traffic periods, or, ultimately, provide a fail-over system, we have the expertise to develop a plan to meet these needs.

Features and Benefits

Effective

Enables you to enhance system performance to provide a quick and reliable customer experience.

Scalable

Facilitates the development of a scalable infrastructure from the outset so that your system can grow as your business grows.

Leading Edge

Provides solutions that utilize best-of-breed technologies to optimize the effectiveness of your Web environment.

Results Focused

Allows you to reduce business risk and minimize associated costs.

Specifications

Technology

We support multiple operating systems, including UNIX, Microsoft Windows, and Linux using best-of-breed server technology from Hewlett-Packard, Sun, and IBM.
